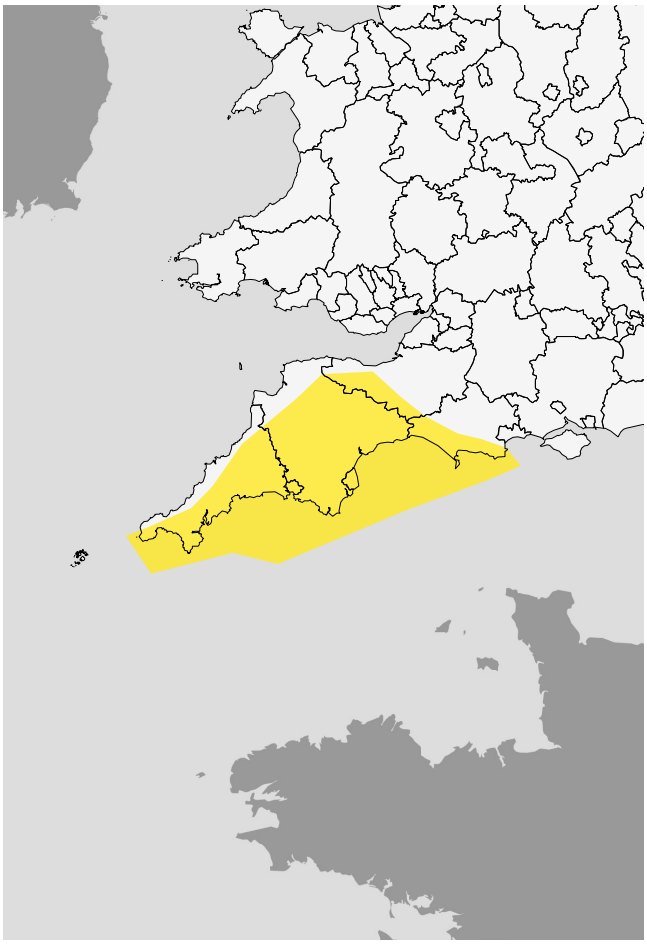
Yellow warning
Snow & Ice

Between
00:00 Thu 11 Feb 2021 and
11:00 Thu 11 Feb 2021



Icy patches and wintry showers may cause some travel disruption.

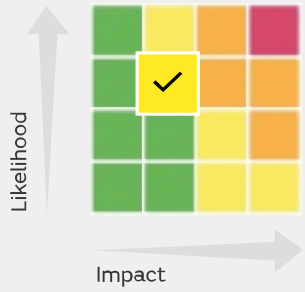
What to expect

- Some roads and railways likely to be affected with longer journey times by road, bus and train services
- Some injuries from slips and falls on icy surfaces
- Probably some icy patches on some untreated roads, pavements and cycle paths

Further details

Icy patches are likely to develop on some surfaces as showers spread from the English Channel into parts of southwest England.

Some places will miss these showers and remain dry. Where showers do occur inland they will fall as snow, especially over the hills and moors, and patchy accumulations of 1-2 cm snow are possible with a few centimetres of snow falling over parts of Dartmoor. Meanwhile, in coastal areas, showers are more likely to fall as a mixture of rain, sleet and snow and any accumulations of snow will be much smaller and patchier in nature.



Medium likelihood of low impacts

Issued at 10:31 Wed 10 Feb, 2021
